

Cloud Document Delivery for the Fax Machine

- Fax without Phone Lines
- Direct Message
- EHR / EMR
- Email

Connecting the Fax Machine to Everything

The fax machine is the easiest sending mechanism for paper based documents. It's also the easiest scanning device. On top of that, most business and medical clinics still have and use both fax machines and Multi-Function Printers (MFPs).

Connecting Your Fax Machine

- Continue faxing with existing fax machines, MFPs without phone lines
- Direct to Email
- Cloud Storage and Workflow: Box and Dropbox
- EMR / EHR and Direct Messaging
- Other Fax Service Providers like OpenText™ (EasyLink) and many others

Business / Enterprise	Medical / Government	Rural

Redefining Fax Connectivity

Simple. Reliable. Secure. **Universal.**

All Clients, One Place

NativeFAX offers you a complete faxing solution no matter what you like to use.

- Fax Machines
- Email to Fax / Fax to Email
- Web Browser Clients

AudioCodes HTTPS Fax ATA
Connects any Fax Machine or MFP securely and reliably to NativeFAX

Bringing it all Together

Most online fax services allow you only to use email and web browser clients to send or receive faxes leaving your fax machine connected to the same infrastructure as your office phone.

NativeFAX exclusively allows you to bring the fax machine to your fax solution no matter what you use.

Even if you have an existing fax provider like OpenText™ (EasyLink), you can still connect your fax machine to it allowing for more client options.

Secure Cloud Faxing

NativeFAX's cloud-based fax network and fax solutions for the Healthcare Industry are HIPAA compliant. We take it farther than the general HIPAA conduit exception, as that is not sufficient protection for cloud-connected fax solutions. We are a business associate under HIPAA. We are also PHI secure with our HTTPS encrypted connections, real-time monitoring and diagnostic tools.

For more information about NativeFAX's secure cloud fax solutions or connecting your existing fax solution to the cloud please contact ICON.
